

Eco-Vac in the Field

During field tests, a prototype Eco-Vac was installed in a major 5 star chain restaurant in Mesa Arizona, and again in Ferndale Washington. In preparation for these tests a tamper-proof gallon meter was attached to the hot water line on only ONE pot and pan scrub sink. The meter was installed to track the gallons of hot water used during pre-wash rinsing, and the results were astounding. On one hot water line, in one sink, these medium sized chain restaurants used approximately 300 gallons of hot water per day. Each establishment was open seven days per week; that's over 100,000 gallons of hot water per year, per sink! This is water and energy you save with Eco-Vac.

During another field test, waste water was tested before an Eco-Vac was installed, and again during Eco-Vac use. Again, the results were astounding, tests demonstrated that Eco-Vac pre-rinse treatment reduced FOG by 98%. Think of it this way: If the water hitting your current grease interceptor was already 98% FOG-free, what would that do to your maintenance and servicing expenses?

Eco-Vac doesn't just save you water, that's a side-benefit. Eco-Vac is a grease prevention device, a water saver, energy saver and most of all it's a powerful kitchen appliance.

Eco-Vac is a waterless system for preventing Fats, Oils and Grease from accumulating during kitchen pre-wash processes. Eco-Vac products were designed with Commercial, Marine and home application in mind.

While two-thirds of the earth's surface is covered in water, less than one percent of the water on earth is drinkable.

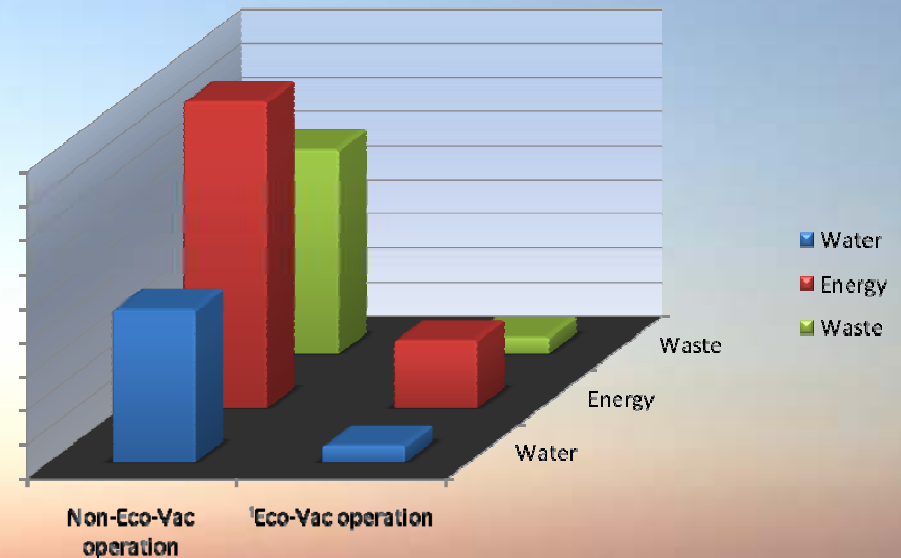

Eco-Vac saves you money every day by:

- Preventing grease build up & trap clogging
- Preventing regulatory hassles
- Reducing septic maintenance
- Saving WATER...lots of it!
- Saving Energy!

How many ways do I pay for hot water?

You PAY in 5 ways...SAVE in one big way with Eco-Vac!

¹Conservative annual usage rates based upon 300 gallons of hot water per day heated at a cost of \$.035 per Gallon; costs for comparisons purposes only rates and usage may vary

WHAT'S YOUR MONTHLY TOTAL?

- | | |
|-----------------------------------|-----------------|
| 1. Water access | \$ _____ |
| 2. Water usage fees | \$ _____ |
